Allowable Subject Matter

5. Claims 93-104 are allowed.
6. The following is an examiner's statement of reasons for allowance: The prior art of record, Reynolds et al. (U.S. 6,688,527) in view of Bard et al. (U.S. 6,145,746), taken alone or in combination with any other references, fails to specifically teach a wireless hand-supportable bar code reader in two-way RF communication with a station, wherein the bar code reader further includes a data group packet buffer, a first RF-based transceiver chipset, disposed in the hand-supportable housing; a second RF-based transceiver chipset disposed with the base station for enabling communication of data packets between the wireless reader and the station, and wherein a controller automatically detects when the reader is outside of predetermined RF range based on a strength of the detected reference signal, and thereupon automatically collect and store in the data packet group buffer. These limitations in conjunction with other limitations in the claimed invention were not shown by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
